EDUCATION

Bharati Vidyapeeth College of Engineering, Pune — *B.Tech*

July 2019 - present

Currently in 3rd year of electronics engineering course with an average gpa of 9.0

PROJECTS

NEWS21 — *react, newsapi, bootstrap*

A daily go-to react app, for everyday updates of what's happening around the world.

Features & Use Cases :

1. News is fetched via an api which brings news articles from numerous sources around the world.
2. Users can read news from their favorite categories.
3. New articles get published every 30 minutes.

SuperBlock — *react, coingeckoapi, mui, charts.js*

A web-app built for all blockchain & crypto enthus, having all the needs loaded into a single react-app

Features & Use Cases :

1. Live price tracker of all cryptocurrencies with line charts and news.
2. Resource and communities section listing all the amazing courses, blogs, twitter handles and discord servers.
3. A developers section having all the useful apis and guides

Future Updates :

- Live and dynamic demonstration of mining and transaction processing to teach the concepts more efficiently.

TeeCom — *Full Stack MERN application*

An E2E tshirt ecommerce app being built using MERN stack and Redux

Features & Use Cases :

1. Different hierarchical roles —admin, subadmin, user
2. Backend written in express and using MongoDB database
3. User friendly UI for seamless experience

**Backend of the project is developed, and tested via postman. Frontend and payment gateway are still under development.*
